

2010-2-PIB-8I8O

Addressable fire panel accessory, Peripherals Interface Board, 8 inputs, 8 outputs

Overview

The 2010-2-PIB-8I8O Peripherals Interface Board is an accessory of the small to medium size intelligent addressable life safety control systems. In total there are 4 variants of this board. The 2010-2-PIB-8I8O is a reduced variant of the 2010-2-PIB and is perfect if your only looking for having additional supervised inputs and outputs to interface other electronic equipment on site.

Functionality

The 2010-2-PIB-818O Peripherals Interface Board provides eight inputs and outputs for compatible control panels. The board can be powered from the control panel or from an external power supply, providing 24 VDC to each of the supervised outputs. Inputs and outputs are supervised for short circuit and open circuit faults.

Mounting & connections

The board can be plugged directly on the front of the main board inside the big size control panel variants on top of the new release 3 chassis. No additional wiring is required. You can use the pluggable connectors to make your connections to the field wiring. Connect an external power supply to the board directly to reduce the load of your system.

Details

- · 8 supervised inputs
- 8 supervised outputs
- · Option to externally power
- Pluggable connectors

$2010 - 2 - P \mid B - 8 \mid 80$ Addressable fire panel accessory, Peripherals Interface Board, 8 inputs, 8 outputs

Technical specifications

General	
Compatibility	Release 3 hardware / firmware
Electrical	
Power supply type	VDC
Operating voltage	24 VDC
Current consumption	40 mA max.(standby)
	4050 mA max. (activated)
Output	
Output type and rating	500 mA at 25°C (activated, per output)
Physical	
Form factor	Large
Physical dimensions	105 x 192 mm (W x H)
Net weight	142 g
Shipping weight	240 g
Mounting type	In cabinet
Environmental	
Environmental Operating temperature	+5 to +40°C
	+5 to +40°C -20 to +50°C
Operating temperature	
Operating temperature Storage temperature	-20 to +50°C
Operating temperature Storage temperature Relative humidity	-20 to +50°C
Operating temperature Storage temperature Relative humidity Regulatory	-20 to +50°C 10 to 95% noncondensing
Operating temperature Storage temperature Relative humidity Regulatory Compliancy	-20 to +50°C 10 to 95% noncondensing CPD, RoHS, WEEE
Operating temperature Storage temperature Relative humidity Regulatory Compliancy Certification	-20 to +50°C 10 to 95% noncondensing CPD, RoHS, WEEE
Operating temperature Storage temperature Relative humidity Regulatory Compliancy Certification Input activation	-20 to +50°C 10 to 95% noncondensing CPD, RoHS, WEEE EN54-13, EN54-2
Operating temperature Storage temperature Relative humidity Regulatory Compliancy Certification Input activation Open circuit	-20 to +50°C 10 to 95% noncondensing CPD, RoHS, WEEE EN54-13, EN54-2 >20.2 kOhm
Operating temperature Storage temperature Relative humidity Regulatory Compliancy Certification Input activation Open circuit Quiescent	-20 to +50°C 10 to 95% noncondensing CPD, RoHS, WEEE EN54-13, EN54-2 >20.2 kOhm 15 kOhm
Operating temperature Storage temperature Relative humidity Regulatory Compliancy Certification Input activation Open circuit Quiescent Activated	-20 to +50°C 10 to 95% noncondensing CPD, RoHS, WEEE EN54-13, EN54-2 >20.2 kOhm 15 kOhm 60.2 Ohm to 8 kOhm <60.2 Ohm
