Improvements and new features in Firmware V9.1 FP10

- Issue solved regarding short motion recording gaps detected when using S6 cameras used in combination with certain TruVision recorders
- Improvements on camera OSD characters for certain EMEA languages
- Security updates
- Minor translation corrections in multilingual camera web interface
- Missing ISAPI alarm events added
- Renewal of web plugin certificate
- Extended camera support: FW v9.1 FP10 can be used for both S5 and S6 cameras

Important note: After updating the camera, restore default settings and reconfigure the camera.

Contacting support

For help installing, operating, maintaining, and troubleshooting this product, refer to this document and any other documentation provided. If you still have questions, contact us during business hours (Monday through Friday, excluding holidays).

Note: Please be ready at the equipment before calling.
